		<b>POTENTIAL HAZARDOUS WASTE SITE IDENTIFICATION</b>		REGION 6	SITE NUMBER TXD000837401
<b>NOTE:</b> The initial identification of a potential site or incident should not be interpreted as a finding of illegal activity or confirmation that an actual health or environmental threat exists. All identified sites will be assessed under the EPA's Hazardous Waste Site Enforcement and Response System to determine if a hazardous waste problem actually exists.					
A. SITE NAME Houston Light and Power P. H. Robinson Generating Station			B. STREET (or other identifier) State Hwy 146, One mile north of FM 517		
C. CITY Bacliff		D. STATE TX	E. ZIP CODE 77518	F. COUNTY NAME Galveston	
G. OWNER/OPERATOR (if known)					
1. NAME Houston Lighting & Power Company/Same				2. TELEPHONE NUMBER (713) 481-7145	
H. TYPE OF OWNERSHIP (if known)					
<input type="checkbox"/> 1. FEDERAL <input type="checkbox"/> 2. STATE <input type="checkbox"/> 3. COUNTY <input type="checkbox"/> 4. MUNICIPAL <input checked="" type="checkbox"/> 5. PRIVATE <input type="checkbox"/> 6. UNKNOWN					
I. SITE DESCRIPTION The site generates electricity and is located on 1343.6 acres near Galveston Bay, Salt Bayou and is approximately 1 mile south of Bacliff on State Hwy. 146. The facility has installed monitor wells on site for groundwater monitoring evaluation for potential migration of hazardous wastes.  Lat: N 29°29'13" Long: W94°58'47"					
J. HOW IDENTIFIED (i.e., citizen's complaints, OSHA citations, etc.) Environmental Priorities Initiative				K. DATE IDENTIFIED (mo., day, & yr.) 8/5/88	
L. SUMMARY OF POTENTIAL OR KNOWN PROBLEM In examining the RCRA files, the facility has had three clay-lined surface impoundments that received wastes from the inorganic and organic acid metal cleaning operation and the demineralizer regenerator since 1977. The facility also has had six clay-lined sand drying beds for the collection and processing of sludge from the chemical waste treatment system and oily waste treatment system since 1978. The actual number of years this process of waste treatment or some other method of waste treatment prior to 1977 was not determined by the file search. Since the method of waste treatment prior to 1977 was not determined, the site's location near Galveston Bay and Salt Bayou and moderately permeable sediments underlying the surface impoundments, there is a potential migration problem of hazardous chemicals into these two surface waters and the groundwater.					
M. PREPARER INFORMATION					
1. NAME Larry K. Landry, FIT Chemist			2. TELEPHONE NUMBER (214) 742-6601		3. DATE (mo., day, & yr.) August 10, 1988

90066971
